

Most frequently prescribed medications

Aetna Specialty Pharmacy®

A specialty pharmacy is a provider of specialty medications to treat certain complex diseases, like multiple sclerosis, hemophilia and immune system disorders. Specialty medications can be injected, infused, or taken by mouth. These medications may need to be refrigerated. They are often expensive and may not be available at retail pharmacies. Some may have side effects, so a pharmacist or nurse should monitor their use.

Aetna Specialty Pharmacy offers high-touch, therapy-specific support services to its members during their treatment with specialty medications.

Aetna is the brand name used for products and services provided by one or more of the Aetna group of subsidiary companies. The Aetna companies that offer, underwrite or administer benefits coverage include: Aetna Health Inc., Aetna Health of California Inc., Aetna Health Insurance Company of New York, Aetna Health Insurance Company and/or Aetna Life Insurance Company (Aetna). Each insurer has sole financial responsibility for its own products.

Aetna Specialty Pharmacy refers to Aetna Specialty Pharmacy, LLC, a subsidiary of Aetna Inc., which is a licensed pharmacy that operates through specialty pharmacy prescription fulfillment. The charges Aetna negotiates with Aetna Specialty Pharmacy may be higher than the cost it pays for the drugs and the costs of its specialty pharmacy services. For these purposes, Aetna Specialty Pharmacy's cost of purchasing drugs takes into account discounts, credits and other amounts it may receive from wholesalers, manufacturers, suppliers, and distributors.
